

Cetrin

Cetirizine Dihydrochloride BP 10mg Capsule

Composition : Cetrin Soft Capsule : Each soft gelatin capsule contains Cetirizine Dihydrochloride BP 10mg.

Pharmacology : Cetirizine Dihydrochloride is a potent H1 receptor antagonist without any significant anticholinergic and antiserotonin effects. At pharmacologically active dose levels, it has almost no drowsiness effect and does not cause behavioral changes. It inhibits the histamine-mediated early phase of the allergic reaction and also reduces the migration of inflammatory cells and the release of mediators associated with the late phase of the allergic reaction.

Indication : It is indicated for the relief of symptoms- It is indicated for the relief of symptoms associated with seasonal allergic rhinitis due to allergen. Symptoms treated effectively include sneezing, rhinorrhea, pruritus, ocular pruritus, tearing and redness of the eyes. It is indicated for the relief of symptoms associated with perennial allergic rhinitis due to allergens. Symptoms treated effectively include sneezing, rhinorrhea, post-nasal discharge, nasal pruritus, ocular pruritus and tearing. It is indicated for the treatment of the uncomplicated skin manifestations of chronic idiopathic urticaria. It is also used in allergen induced asthma.
